1. Product Description:

Circular Saw Blade

Dimensions (in):	10" x 1"-5/8"
Dimensions (mm):	255 x 25.4 -15.9
Specification:	MADERA 80T
Number of Teeth:	80
Max. rpm:	5,500
Line:	HUM®

SM80

D = 255 mm
H = 25.4 - 15.9 mm

* Includes 15.9 mm arbor reducer

1. Application

- Saw blade for cutting wood.
- Excellent cutting performance and long service life.
- TCT (Tungsten Carbide Tipped) construction.
- Provides a good surface finish.
- Excellent price-to-performance ratio.

2. Operating instructions

- Use with a miter saw.
- Mount the saw blade and allow it to run at no-load speed for one minute to verify that it is not damaged.
- Do not apply excessive pressure or strike the blade against the workpiece.
- Ensure the wood is free of nails, screws, or staples before cutting. Impact with metal can fracture or detach the tungsten carbide teeth.
- Keep the saw blade free of resin or pitch buildup. A dirty blade generates excessive friction, overheats, and reduces cut quality.

3. Safety information

- Never exceed the maximum speed marked on the product label.
- Always wear appropriate personal protective equipment (PPE), including gloves, hearing protection, respiratory protection, and safety glasses.
- Always use the saw blade only for cutting the recommended material.

- Observe the direction of rotation indicated by the arrow on the saw blade body.
- Improper use may result in serious injury.

4. Handling

- Initial inspection should be performed while the product is in its original packaging. If there is visible evidence of damage, the product should not be accepted.
- Handle saw blades carefully to prevent impacts, drops, or damage. If a blade is cracked, has a broken or detached section, or is suspected of being damaged, it must not be mounted or used.

5. Storage

- Store the product in a dry place at room temperature. Keep the saw blade in its original cardboard packaging to protect it from dust and prevent the steel core from rusting.
- Never stack saw blades on top of each other without spacers. Direct physical contact between the tungsten carbide teeth can cause chipping or micro-fractures.

6. Packaging units

- 1 piece.
